PROJECTS

PRODCT BUDDY
Mern Developer | May 2022 – Present | Indore, M.P
A product management platform through which a manufacturer of the product can manage their product inventory through a unique SKU key Can track the product sales according to geographical user location, Also they can easily send offers and nudges on the product via QR code.

KOTAK SECURITY - SPECTER
Backend Developer | Dec 2021 – May 2022 | Pune, MAHARASHTRA
Specter is a Customer activation platform that helps to bring more customers and Improve customer Engagement through users' past activities and events. We have used 3.5 million existing users' data and present user events to send offers and nudges to gather customer attention. It's a marketing tool that helps Kotak security to gather potential customers.

GUGLI - WATER SUPPLY MANAGEMENT
MERN Developer | July 2020 – Oct 2021 | Indore, M.P
A problem-solving tool that notifies people of the particular area when they got water supply from municipalities. There are two panels in this application, one is for the User, and another is for the Supplier. When a supplier presses a single button in a particular colony then the users of that area get a notification through the sound indicator notification.

MSGO
React Native Developer
A weather app that notifies users of their current weather conditions and provides suggestions to keep necessary things to protect themselves in the rainy season app notifies that please bring an umbrella and raincoat to protect get wet, etc.
