WHY UNIRIQUE MELANGE

ON-THE-GO COCKTAIL

If it's premixed, it's not fresh.

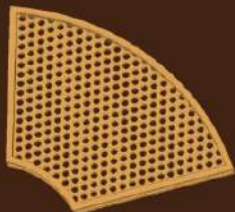

Rather it's a synthetic liquid with a cheap imitation of the natural thing!

Our RTMD* Cocktail Bottle will change that.

* Ready-to-Mix and Drink (RTMD)TM

This product can carry 2 to 8 different ingredients that are separately held from each other till the point of consumption. This product is highly customizable as the carrying capacity of each ingredient can be increased or decreased according to individual requirements.

There is space for a strainer to be placed on any compartment that contains such an ingredient that requires filtration at the time of consumption.

SECTION A

Section A securely holds the ingredients in oxygen and moisture free compartments. The ingredients are held in place by the help of a cap that gets released when the bottle gets played allowing the ingredients to submerge in the liquid in Section C.

SECTION B

After being released, the cap remains with in Section B rotating 360 degrees helping in creating a seriously smooth mixture.

The space designed and purposely left in side the bottle acts as a Boston Shaker so that the ingredients can be thoroughly and properly mixed.

SECTION C

Section C also securely holds the liquid intact with the help of air tight seals

WHAT ONIRIQUE MÉLANGE...

Mixology involves a good chemistry along with the right amount of ingredients to dish out innovative and classic cocktails. The chemistry part maybe easy but to get the same taste each time considering 4-8% margin of error ascribed to humans is difficult.

Indian Mixologist Shatbhi Basu says it is essential to grow into a great bartender before allowing oneself the luxury of being a mixologist. "You need to go beyond the ordinary, deep into the underbelly of the spirited world. Emerge steeped in the how's and why's of every bottle that sits on the shelf. Respect every drop that goes into making your cocktail creation. Walk inside the minds of the customer. Understand and interpret his psyche. Then you can walk in the shoes of the mixologist."

This level of precision and the knowledge of the chemistry of liquids is needed each time the drink needs to be made. And since the human element is involved, this cannot be gotten as one cannot have a perfect mixologist everywhere at every bar. And the places where you do, the mixologist comes at a hefty salary and so most of these perfect blends become inaccessible to the come man.

How would it be that each time you get the perfect recipe, with precise calculated blends along with the same great taste that is loved by many. There will be no suspense to the taste, and you can just enjoy one of many liquid pleasures only made possible through our RTMD* Cocktail Bottle(s).

We can make our RTMD* Cocktail Bottle(s) to the precise calculations that are needed for each different recipe and allow companies to sell their products that are already in the market.
